Exercise 1
Conditionals

In this exercise, we will ask the user for his/her first and last name, and date of birth, and print them out formatted ,and make the program check the input first, and if the user enters invalid input, your program should print an error message "Invalid information".

Here is an example of what this program should do:

Output:
Enter your first name: xxxx
Enter your last name: yyyy
Enter your date of birth:
Month? March
Day? 30
Year? 2018
"Invalid information"

Exercise 2
Conditionals
Write a program that checks to see if a number N is divisible by 8 or not?
